RESEARCH AREAS

My research in **Human-Computer Interaction (HCI)** centers on **Human-Centered Artificial Intelligence (AI)** and **Design Research**, with a particular focus on integrating human-centered principles into AI system design.

A major strand of my work involves collaborating with key stakeholders in the online information ecosystem, such as journalists, fact-checkers, and the public, **to address mis/disinformation and foster informed public discourse** [J6, J5, J4, M2]. More recently, I have expanded my interests to AI-accelerated scientific discovery, **examining how large language models (LLMs) and LLM-based agents may shape different stages of research activities** [M5, M4]. In addition, building on my prior work, I continue to investigate **service design for older adults' tech literacy and health** [J3, J2, C5, C3, C2, C1, M1] and **information visualization** [J1, C4, P4].
